2021 Federal Legislative Agenda

The Association of State and Territorial Health Officials (ASTHO) supports strengthening and preserving all programs that are effective to advancing the public’s health and well-being. Federal, state, and local public health programs have been historically underfunded and undervalued. ASTHO supports addressing the social determinants of health and preserving current federal investments for all of these efforts, including programs that ensure access to healthcare services. ASTHO also supports providing supplementary increases in funding without cutting other public health programs. The federal legislative priorities listed below reflect the most pressing needs of state and territorial health officials.

Tier I

**ASTHO will play a lead role in advocacy for:**
Emergency supplemental funding and programs to address the COVID-19 pandemic, including but not limited to mitigation and vaccine administration.

Increased funding for public health including CDC and ASPR through the annual appropriations bills. Specific cross-cutting programs include:
- CDC Public Health Emergency Preparedness (PHEP) cooperative agreements
- CDC programs funded via the Prevention and Public Health Fund
- CDC Preventive Health and Health Services Block Grant
- ASPR Hospital Preparedness Program
- ASPR National Ebola Training and Education Center and the National Ebola Treatment network

Supporting innovative programs, strategies, and funding to provide a long-term investment in federal, state, territorial, and local public health to address workforce shortfalls and public health infrastructure.

Promoting access to healthcare as a critical component of the U.S. public health system for states, territories, and tribes. Specifically:
- Support coverage for services including primary care and preventive services, maternal and child health services, and community and social services that address the social determinants of health.
- Support legislation to develop a long-term solution to Medicaid financing for the U.S. territories.

Supporting the renewal of the Compacts of Free Association for the Freely Associated States (FAS).

Supporting funding and policies to improve overall vaccination rates throughout the country.

Tier II

**ASTHO will actively work with key partners to:**
Support funding for ASTHO affiliates’ programmatic priorities across HHS with an emphasis on CDC, the Health Resources and Services Administration (HRSA), and the Substance Abuse and Mental Health Services Administration (SAMHSA) programs that fund state and territorial health agencies.

Support programs, policies, and funding to address HIV/AIDS and Hepatitis C.
Support federal funding for research related to preventing firearm injury and death.

Support funding and programs to combat healthcare-associated infections and antimicrobial resistance including promoting antibiotic stewardship and sepsis awareness, prevention, and treatment.

Support HHS policy, programs, and funding for public health data sharing, modernization efforts, and data governance.

Support HHS funding and programs to address maternal morbidity and mortality.

Support HHS funding and regulations to ensure a robust environmental health system which includes mitigation and preparation for extreme weather events.

Support funding for CDC and FDA food safety and related programs.

Support funding and legislation to address substance abuse and misuse, including the opioid epidemic.

Support funding, legislation, and promulgation of regulations to support comprehensive tobacco control programs, which include e-cigarettes.

Support policies and funding to address obesity, including increasing physical activity and access to healthy foods.

Support the reauthorization of the Maternal, Infant, and Early Childhood Home Visiting program which is set to expire in FY22.

Support healthy aging initiatives to promote the health and well-being of adults.

Authorize and reauthorize other public health programs as appropriate.

Tier III
ASTHO will monitor and support efforts as time and resources allow to:

- Special Supplemental Nutrition Program for Women, Infants, and Children
- U.S. Food and Drug Administration
- HHS Office of Population Affairs
- CDC Social Determinants of Health new initiative

This legislative agenda is meant to guide ASTHO’s federal advocacy work. ASTHO staff, with direction and oversight of the board and ASTHO Government Relations Committee, may have to reprioritize, add, or delete agenda items depending on emerging new initiatives, threats, and Congressional activities.
